PROJECTS / OPEN-SOURCE

FREEWAY (REMAKE) | [Link](#)

Javascript

A game created based on the Freeway mini game, released in 1981 by Activision, you can see more about the project through the GitHub repository link. Only the JavaScript language was used on the P5.js online platform.

RESTAURANT (API) | [Link](#)

Typescript and PrismaORM

Project developed as part of the note composition for the Web Programming subject of the TADS course, where we had to develop a complete system for a restaurant. I was in charge of building the API, I used PrismaORM to store the data and TypeScript to build the API.

BLOG (API) | [Link](#)

Spring MVC, MySQL and HibernateORM

Project developed during the study of a handout referring to Spring MVC and Hibernate, the ORM Hibernate was used, for persistence in the database, DBMS: MySQL, and Spring MVC for construction of the API.

HELP DESK SYSTEM | [Link](#)

Java, Java Swing, VertrigoServ and MySQL

Project that manages calls for faulty machines in a fictitious company. The Java language plus the MySQL database, available on VertrigoServ, was used to make the entire Back-End, and the Java Swing library was used to make the Front-End.
